

development. We believe the book to serve as a reference for larger audience such as systems architects, practitioners, developers, new researchers, and graduate-level students. This book also comes with an associated Web site (hosted at <http://www.manjrasoft.com/CloudBook/>) containing pointers to advanced on-line resources.

ORGANIZATION OF THE BOOK

This book contains chapters authored by several leading experts in the field of cloud computing. The book is presented in a coordinated and integrated manner starting with the fundamentals and followed by the technologies that implement them.

The content of the book is organized into six parts:

- I. Foundations
- II. Infrastructure as a Service (IaaS)
- III. Platform and Software as a Service (PaaS/SaaS)
- IV. Monitoring and Management
- V. Applications
- VI. Governance and Case Studies

Part I presents fundamental concepts of cloud computing, charting their evolution from mainframe, cluster, grid, and utility computing. Delivery models such as Infrastructure as a Service, Platform as a Service, and Software as a Service are detailed, as well as deployment models such as Public, Private, and Hybrid Clouds. It also presents models for migrating applications to cloud environments.

Part II covers Infrastructure as a Service (IaaS), from enabling technologies such as virtual machines and virtualized storage, to sophisticated mechanisms for securely storing data in the cloud and managing virtual clusters.

Part III introduces Platform and Software as a Service (PaaS/IaaS), detailing the delivery of cloud hosted software and applications. The design and operation of sophisticated, auto-scaling applications and environments are explored.

Part IV presents monitoring and management mechanisms for cloud computing, which becomes critical as cloud environments become more complex and interoperable. Architectures for federating cloud computing resources are explored, as well as service level agreement (SLA) management and performance prediction.

Part V details some novel applications that have been made possible by the rapid emergence of cloud computing resources. Best practices for architecting cloud applications are covered, describing how to harness the power of loosely coupled cloud resources. The design and execution of applications that leverage

- 14.4 MapReduce Impacts and Research Directions / 385
- 14.5 Conclusion / 387
 - Acknowledgments / 387
 - References / 387

PART IV MONITORING AND MANAGEMENT 391

15 An Architecture for Federated Cloud Computing 393

Benny Rochwerger, Constantino Vázquez, David Breitgand, David Hadas, Massimo Villari, Philippe Massonet, Eliezer Levy, Alex Galis, Ignacio M. Llorente, Rubén S. Montero, Yaron Wolfsthal, Kenneth Nagin, Lars Larsson, and Fermín Galán

- 15.1 Introduction / 393
- 15.2 A Typical Use Case / 394
- 15.3 The Basic Principles of Cloud Computing / 398
- 15.4 A Model for Federated Cloud Computing / 400
- 15.5 Security Considerations / 407
- 15.6 Summary and Conclusions / 410
 - Acknowledgments / 410
 - References / 410

16 SLA Management in Cloud Computing: A Service Provider's Perspective 413

Sumit Bose, Anjaneyulu Pasala, Dheepak R. A, Sridhar Murthy and Ganesan Malaiyandisamy

- 16.1 Inspiration / 413
- 16.2 Traditional Approaches to SLO Management / 418
- 16.3 Types of SLA / 421
- 16.4 Life Cycle of SLA / 424
- 16.5 SLA Management in Cloud / 425
- 16.6 Automated Policy-based Management / 429
- 16.7 Conclusion / 435
 - References / 435

17 Performance Prediction for HPC on Clouds 437

Rocco Aversa, Beniamino Di Martino, Massimiliano Rak, Salvatore Venticinque, and Umberto Villano

- 17.1 Introduction / 437
- 17.2 Background / 440

23.3	Homo Sapiens and Digital Information /	575
23.4	Cloud Computing and Data Security Risk /	576
23.5	Cloud Computing and Identity /	578
23.6	The Cloud, Digital Identity, and Data Security /	584
23.7	Content Level Security—Pros and Cons /	586
23.8	Future Research Directions /	588
23.9	Conclusion /	590
	Acknowledgments /	591
	Further Reading /	591
	References /	591

24 Legal Issues in Cloud Computing **593**

Janine Anthony Bowen

24.1	Introduction /	593
24.2	Data Privacy and Security Issues /	596
24.3	Cloud Contracting models /	601
24.4	Jurisdictional Issues Raised by Virtualization and Data Location /	603
24.5	Commercial and Business Considerations—A Cloud User's Viewpoint /	606
24.6	Special Topics /	610
24.7	Conclusion /	611
24.8	Epilogue /	611
	References /	612

25 Achieving Production Readiness for Cloud Services **615**

Wai-Kit Cheah and Henry Kasim

25.1	Introduction /	615
25.2	Service Management /	615
25.3	Producer—Consumer Relationship /	616
25.4	Cloud Service Life Cycle /	620
25.5	Production Readiness /	626
25.6	Assessing Production Readiness /	626
25.7	Summary /	634
	References /	634
